CD: COMPILER DESIGN

TOPIC On : FIRST() AND FOLLOW()

By SHWETA TIWARI

Under On: Basic Parsing Techniques

TOPIC On : FIRST() AND FOLLOW()

First and Follow-

First and Follow sets are needed so that the parser can properly apply the needed production rule at the correct position.

First Function-

$\text{First}(\alpha)$ is a set of terminal symbols that begin in strings derived from α .

Example-

Consider the production rule-

$$A \rightarrow abc / def / ghi$$

Then, we have-

$$\text{First}(A) = \{ a, d, g \}$$

Rules For Calculating First Function-

Rule-01:

For a production rule $X \rightarrow \epsilon$,

$$\text{First}(X) = \{ \epsilon \}$$

Rule-02:

For any terminal symbol 'a',

$$\text{First}(a) = \{ a \}$$

Rule-03:

For a production rule $X \rightarrow Y_1 Y_2 Y_3$,

Calculating First(X)

- If $\epsilon \notin \text{First}(Y_1)$, then $\text{First}(X) = \text{First}(Y_1)$
- If $\epsilon \in \text{First}(Y_1)$, then $\text{First}(X) = \{ \text{First}(Y_1) - \epsilon \} \cup \text{First}(Y_2 Y_3)$

Calculating First($Y_2 Y_3$)

- If $\epsilon \notin \text{First}(Y_2)$, then $\text{First}(Y_2 Y_3) = \text{First}(Y_2)$
- If $\epsilon \in \text{First}(Y_2)$, then $\text{First}(Y_2 Y_3) = \{ \text{First}(Y_2) - \epsilon \} \cup \text{First}(Y_3)$

Similarly, we can make expansion for any production rule $X \rightarrow Y_1 Y_2 Y_3 \dots Y_n$.

Follow Function-

$\text{Follow}(\alpha)$ is a set of terminal symbols that appear immediately to the right of α .

Rules For Calculating Follow Function-

Rule-01:

For the start symbol S , place $\$$ in $\text{Follow}(S)$.

Rule-02:

For any production rule $A \rightarrow \alpha B$,

$$\text{Follow}(B) = \text{Follow}(A)$$

Rule-03:

For any production rule $A \rightarrow \alpha B \beta$,

- If $\epsilon \notin \text{First}(\beta)$, then $\text{Follow}(B) = \text{First}(\beta)$
- If $\epsilon \in \text{First}(\beta)$, then $\text{Follow}(B) = \{ \text{First}(\beta) - \epsilon \} \cup \text{Follow}(A)$

Important Notes-

Note-01:

- \in may appear in the first function of a non-terminal.
- \in will never appear in the follow function of a non-terminal.

Note-02:

- Before calculating the first and follow functions, eliminate **Left Recursion** from the grammar, if present.

Note-03:

- We calculate the follow function of a non-terminal by looking where it is present on the RHS of a production rule.

PRACTICE PROBLEMS BASED ON CALCULATING FIRST AND FOLLOW-

Problem-01:

Calculate the first and follow functions for the given grammar-

$$S \rightarrow aBDh$$

$$B \rightarrow cC$$

$$C \rightarrow bC / \epsilon$$

$$D \rightarrow EF$$

$$E \rightarrow g / \epsilon$$

$$F \rightarrow f / \epsilon$$

Solution-

The first and follow functions are as follows-

First Functions-

- $\text{First}(S) = \{ a \}$
- $\text{First}(B) = \{ c \}$
- $\text{First}(C) = \{ b, \epsilon \}$
- $\text{First}(D) = \{ \text{First}(E) - \epsilon \} \cup \text{First}(F) = \{ g, f, \epsilon \}$
- $\text{First}(E) = \{ g, \epsilon \}$
- $\text{First}(F) = \{ f, \epsilon \}$

Follow Functions-

- $\text{Follow}(S) = \{ \$ \}$
- $\text{Follow}(B) = \{ \text{First}(D) - \epsilon \} \cup \text{First}(h) = \{ g, f, h \}$
- $\text{Follow}(C) = \text{Follow}(B) = \{ g, f, h \}$
- $\text{Follow}(D) = \text{First}(h) = \{ h \}$

- $\text{Follow}(E) = \{ \text{First}(F) - \epsilon \} \cup \text{Follow}(D) = \{ f, h \}$
- $\text{Follow}(F) = \text{Follow}(D) = \{ h \}$

Problem-02:

Calculate the first and follow functions for the given grammar-

$$S \rightarrow A$$

$$A \rightarrow aB / Ad$$

$$B \rightarrow b$$

$$C \rightarrow g$$

Solution-

We have-

- The given grammar is left recursive.
- So, we first remove left recursion from the given grammar.

After eliminating left recursion, we get the following grammar-

$$S \rightarrow A$$

$$A \rightarrow aBA'$$

$$A' \rightarrow dA' / \epsilon$$

$$B \rightarrow b$$

$$C \rightarrow g$$

Now, the first and follow functions are as follows-

First Functions-

- $\text{First}(S) = \text{First}(A) = \{ a \}$
- $\text{First}(A) = \{ a \}$
- $\text{First}(A') = \{ d, \in \}$
- $\text{First}(B) = \{ b \}$
- $\text{First}(C) = \{ g \}$

Follow Functions-

- $\text{Follow}(S) = \{ \$ \}$
- $\text{Follow}(A) = \text{Follow}(S) = \{ \$ \}$
- $\text{Follow}(A') = \text{Follow}(A) = \{ \$ \}$
- $\text{Follow}(B) = \{ \text{First}(A') - \in \} \cup \text{Follow}(A) = \{ d, \$ \}$
- $\text{Follow}(C) = \text{NA}$

Problem-03:

Calculate the first and follow functions for the given grammar-

$$S \rightarrow (L) / a$$

$$L \rightarrow SL'$$

$$L' \rightarrow ,SL' / \in$$

Solution-

The first and follow functions are as follows-

First Functions-

- $\text{First}(S) = \{ (, a \}$
- $\text{First}(L) = \text{First}(S) = \{ (, a \}$
- $\text{First}(L') = \{ , , \in \}$

Follow Functions-

- $\text{Follow}(S) = \{ \$ \} \cup \{ \text{First}(L') - \in \} \cup \text{Follow}(L) \cup \text{Follow}(L') = \{ \$, , ,) \}$
- $\text{Follow}(L) = \{) \}$
- $\text{Follow}(L') = \text{Follow}(L) = \{) \}$

Problem-04:

Calculate the first and follow functions for the given grammar-

$$S \rightarrow AaAb / BbBa$$

$$A \rightarrow \epsilon$$

$$B \rightarrow \epsilon$$

Solution-

The first and follow functions are as follows-

First Functions-

- $\text{First}(S) = \{ \text{First}(A) - \epsilon \} \cup \text{First}(a) \cup \{ \text{First}(B) - \epsilon \} \cup \text{First}(b) = \{ a, b \}$
- $\text{First}(A) = \{ \epsilon \}$
- $\text{First}(B) = \{ \epsilon \}$

Follow Functions-

- $\text{Follow}(S) = \{ \$ \}$
- $\text{Follow}(A) = \text{First}(a) \cup \text{First}(b) = \{ a, b \}$
- $\text{Follow}(B) = \text{First}(b) \cup \text{First}(a) = \{ a, b \}$

Problem-05:

Calculate the first and follow functions for the given grammar-

$$E \rightarrow E + T / T$$

$$T \rightarrow T \times F / F$$

$$F \rightarrow (E) / id$$

Solution-

We have-

- The given grammar is left recursive.
- So, we first remove left recursion from the given grammar.

After eliminating left recursion, we get the following grammar-

$$E \rightarrow TE'$$

$$E' \rightarrow + TE' / \in$$

$$T \rightarrow FT'$$

$$T' \rightarrow \times FT' / \in$$

$$F \rightarrow (E) / id$$

Now, the first and follow functions are as follows-

First Functions-

- $\text{First}(E) = \text{First}(T) = \text{First}(F) = \{ (, \text{id} \}$
- $\text{First}(E') = \{ +, \in \}$
- $\text{First}(T) = \text{First}(F) = \{ (, \text{id} \}$
- $\text{First}(T') = \{ x, \in \}$
- $\text{First}(F) = \{ (, \text{id} \}$

Follow Functions-

- $\text{Follow}(E) = \{ \$,) \}$
- $\text{Follow}(E') = \text{Follow}(E) = \{ \$,) \}$
- $\text{Follow}(T) = \{ \text{First}(E') - \in \} \cup \text{Follow}(E) \cup \text{Follow}(E') = \{ +, \$,) \}$
- $\text{Follow}(T') = \text{Follow}(T) = \{ +, \$,) \}$
- $\text{Follow}(F) = \{ \text{First}(T') - \in \} \cup \text{Follow}(T) \cup \text{Follow}(T') = \{ x, +, \$,) \}$

Problem-06:

Calculate the first and follow functions for the given grammar-

$$S \rightarrow ACB / CbB / Ba$$

$$A \rightarrow da / BC$$

$$B \rightarrow g / \in$$

$$C \rightarrow h / \in$$

Solution-

The first and follow functions are as follows-

First Functions-

- $\text{First}(S) = \{ \text{First}(A) - \epsilon \} \cup \{ \text{First}(C) - \epsilon \} \cup \text{First}(B) \cup \text{First}(b) \cup \{ \text{First}(B) - \epsilon \} \cup \text{First}(a) = \{ d, g, h, \epsilon, b, a \}$
- $\text{First}(A) = \text{First}(d) \cup \{ \text{First}(B) - \epsilon \} \cup \text{First}(C) = \{ d, g, h, \epsilon \}$
- $\text{First}(B) = \{ g, \epsilon \}$
- $\text{First}(C) = \{ h, \epsilon \}$

Follow Functions-

- $\text{Follow}(S) = \{ \$ \}$
- $\text{Follow}(A) = \{ \text{First}(C) - \epsilon \} \cup \{ \text{First}(B) - \epsilon \} \cup \text{Follow}(S) = \{ h, g, \$ \}$
- $\text{Follow}(B) = \text{Follow}(S) \cup \text{First}(a) \cup \{ \text{First}(C) - \epsilon \} \cup \text{Follow}(A) = \{ \$, a, h, g \}$
- $\text{Follow}(C) = \{ \text{First}(B) - \epsilon \} \cup \text{Follow}(S) \cup \text{First}(b) \cup \text{Follow}(A) = \{ g, \$, b, h \}$

To gain better understanding about calculating first and follow functions.
